The new Health and Family Life Education Curriculum (Primary Division) is a part of a paradigm shift on the part of the Ministry of Education which began with the White Paper on Educational Development and Policy 2009 – 2012, and continues presently with the implementation of the Child Friendly Schools (CFS) Framework. The CFS Framework is straightforward: schools should operate in the best interests of the child, providing a safe, healthy, productive educational environment that caters to the holistic development of students. Health and Family Life Education (HFLE) provides a comprehensive curriculum which seeks to teach students essential skills for living healthy successful lives. The Ministry of Education has committed to pushing the implementation and delivery of HFLE within primary schools in both St. Kitts and Nevis, as a mechanism to combat issues facing children and youth.

The purpose of this manual is to provide a standardized curriculum to ensure consistency in the delivery of HFLE and to give teachers the knowledge and skills for implementing life skills education, specifically, HFLE curriculum lessons, in their classrooms. The HFLE Curriculum is based on the Regional Curriculum Framework, which sets out the HFLE philosophy and standards for teaching and identifies the desired knowledge, skills and behavioral outcomes for students. The document covers the four (4) thematic areas as mandated by UNICEF in conjunction with the CARICOM Secretariat. These thematic areas are:

- Self and Interpersonal Relationships
- Sexuality and Sexual Health
- Eating and Fitness and
- Managing the Environment.

This Curriculum Guide is laid out in three parts: HFLE Curriculum Background, HFLE Curriculum Content and HFLE Course Outlines. In using this guide it is important to keep foremost in your mind that HFLE is at its heart, a LIFE SKILLS curriculum, and when taught well does more than simply impart information, it provides students the opportunity to develop skills crucial to their development while fostering a sense of personal empowerment. Teachers have been trained to implement the curriculum, I trust that experience, together with this Curriculum Guide will prove helpful in introducing life skills education, specifically HFLE, to primary schools and that it will ultimately result in positive behavior change.

Tricia Esdaille
Senior Education Officer
Ministry of Education and Information

January 2013
ACKNOWLEDGEMENTS

This curriculum is the product of the combined efforts and contributions of a number of partners and stakeholders. We especially would like to acknowledge UNICEF for their steadfast support in ensuring the development and implementation of HFLE in both primary and secondary schools in St. Kitts and Nevis.

The Ministry of Education also wishes to express its sincere appreciation to the following persons who were instrumental in the writing of this new Health and Family Life Education Curriculum Document.

Clarice Cotton - Chief Education Officer
Debra Matthew - Director Child Welfare and Probation
Daryl Lloyd - Education Officer
Josephine Richardson - Guidance Counselor
Claristine Simmons - Teacher (Primary)

We further acknowledge with thanks the following Working Group members without whose input this document would not have been completed.

Mrs. Karen Tyme
Mr. Ron Collins
Ms. Eveline Huggins
Ms. Maesha Liburd
Ms. Nadia Rawlings
Ms. Tracy Wattley
Mrs. Mavis Armstrong
Mr. Clyde Saunders
Ms. Anester Mulraine
Mr. Roysdean Richards
Mrs. Noline Blanchard
Ms. Sharon Morris
Ms. Deslyn Bell Watson
Mrs. Arlene Bruce-Williams
Ms. Donna Peets
INTRODUCTION

LIFE SKILLS EDUCATION

Life skills education is a comprehensive behavior change approach that concentrates on the development of the skills needed for life such as communication, decision-making, managing emotions, assertiveness, self-esteem building, resisting peer pressure, and relationship skills. Additionally, it addresses the important related issues of empowering girls and guiding boys towards values. The program moves beyond providing information. It addresses the development of the whole individual, so that a person will have the skills to make use of all types of information, whether it is related to HIV/AIDS, STDs, reproductive health, parenting, other health issues, and other communication and decision-making situations. The Life Skills approach is completely interactive, using role-plays, games, puzzles, group discussions, and a variety of other innovative teaching techniques to keep the participant wholly involved in the sessions. The acquisition of life skills can greatly affect a person’s overall physical, emotional, social, and spiritual health which, in turn, is linked to his or her ability to maximize upon life opportunities. The success of skills-based health education is tied to three factors: 1) the recognition of the developmental stages that youth pass through and the skills they need as they progress to adulthood, 2) a participatory and interactive method of pedagogy, and 3) the use of culturally relevant and gender-sensitive learning activities.

WHAT IS HFLE?

HFLE is a comprehensive, life skills-based program, which focuses on the development of the whole person in that it:

• Enhances the potential of young people to become productive and contributing adults/citizens.
• Promotes an understanding of the principles that underlie personal and social well-being.
• Fosters the development of knowledge, skills and attitudes that make for healthy family life.
• Provides opportunities to demonstrate sound health-related knowledge, attitudes and practices.
• Increases the ability to practice responsible decision-making about social and sexual behaviour.
• Aims to increase the awareness of children and youth of the fact that the choices they make in everyday life profoundly influence their health and personal development into adulthood.

WHY HFLE?

Life Skills education is designed to facilitate the practice and reinforcement of psychosocial skills in a culturally and developmentally appropriate way. It contributes to the promotion of personal and social development, the protection of human rights, and the prevention of health and social problems. Another justification for the life skills approach is that it is a natural vehicle for the acquisition of educational, democratic and ethical values. In the delivery of Life Skills, the fostering of positive attitudes and values is set alongside the knowledge and skill components. Some of the commonly held values are respect for self and others; empathy and tolerance; honesty; kindness; responsibility; integrity; and social justice.
VISION FOR THE HEALTH AND FAMILY LIFE EDUCATION

To provide a positive stimulating learning environment which maximizes individual potential and ensures that all students are cared for spiritually, morally, intellectually, physically, socially and emotionally and that they are well equipped to meet the challenges of education, work and life.

MISSION STATEMENT

We are committed, through the training of teachers and the development of the Health and Family Life Education curriculum, to fostering a culture of learning grounded in respect, responsibility and results, thereby ensuring our children achieve their full potential and grow to make healthy contributions to the social, cultural and economic development of St Kitts and Nevis. Our vision is attainable through rigorous and relevant curriculum, effective instructional practices, student engagement, and on-going school-wide collaboration that is student-centered and goal-oriented.

HEALTH AND FAMILY LIFE IMPLEMENTATION OBJECTIVES

- To develop a national HFLE curriculum for St. Kitts and Nevis.
- To expand the delivery of HFLE to primary schools and through all grade levels in secondary schools.
- To update the HFLE materials currently used in secondary schools.
- To train guidance counselors as trainers of HFLE
- To ensure that HFLE programs meet regional standards, and maintain appropriate records in order allow for the measurement of the efficacy of programming.
- To ensure that the HFLE Program reflects the tenets of the Ministry of Education’s White Paper.
- To ensure that every school has an appointed HFLE coordinator.
- To ensure that HFLE is delivered in primary schools at least twice per week.
- To ensure the professional development and skills of teachers and guidance counselors involved in the delivery of the HFLE curriculum.
- To provide organizational structure and the tools for effective management and sustainability of Health and Family Life Education within the public schools of St. Kitts and Nevis
PART I: CURRICULUM BACKGROUND
PHILOSOPHY OF EDUCATION

The goals and objectives of the Education System as outlined in the Ministry of Education’s White Paper on Educational Development and Policy 2009 – 2019, provides the foundation for the HFLE Curriculum. This curriculum is based on all the philosophical statements found therein.

The goals of the education system are to:

• Encourage and promote the development of the basic knowledge and skills in all persons, including:
  o the skills of literacy, listening, speaking, reading, writing, numeracy, mathematics, analysis, problem solving, information processing, computing
  o critical and creative thinking skills for today’s world
  o an understanding of the role of science and technology in society together with scientific and technological skills
  o an appreciation and understanding of creative arts
  o physical development and personal health and fitness
  o the creative use of time

• Develop self-worth through positive educational development
• Promote the importance of the family and community
• Provide opportunities to reach maximum potential
• Promote the recognition, understanding and respect for the constitution, laws and national symbols of the state
• Develop an understanding of the principle of gender equality and other forms of equality as defined in the Constitution
• Promote an understanding of the history, language, culture, rights and values of Saint Kitts and Nevis and their role in contemporary society
• Increase awareness and appreciation of the natural environment
• Promote a national and Caribbean identity through regional co-operation and integration
• Develop an understanding of the historical and contemporary role of labor and business in society
• Prepare for participation in the affairs of St. Kitts and Nevis and the global society
Curriculum Basis

The Teaching of Life Skills

The primary goal of HFLE is to change not only a student’s level of knowledge, but to enhance his or her ability to translate that knowledge into specific, positive behaviors. The foundation of life skills education is based on a wide body of theory-based research which has found that people learn what to do and how to act by observing others and that their behaviors are reinforced by the positive or negative consequences which result during these observations. Cooperative learning or group learning is another important aspect of skills acquisition. Many skills-based programs capitalize on the power of peers to influence the acquisition and subsequent maintenance of positive behavior. By working cooperatively with peers to develop pro-social behaviors, students change the normative peer environment to support positive health behaviors (Wodarski and Feit). “As an educational strategy, therefore, skills-based education relies on the presence of a group of people to be effective. The interactions that take place between students and among students and teachers are essential to the learning process.”

The core of life skills that facilitate the practice of healthy behaviors is divided into the following groups:

<table>
<thead>
<tr>
<th>Social Skills</th>
<th>Cognitive Skills</th>
<th>Emotional/Coping Skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Interpersonal Skills</td>

## Types and Categories of Life Skills

<table>
<thead>
<tr>
<th>Life Skills</th>
<th>Definitions</th>
<th>Significance</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Decision making</strong></td>
<td>The ability to choose a course of action from a number of options which may result in a specific outcome or involve only the resolve to behave in a certain way in the future.</td>
<td>Helps us deal constructively with health and other decisions about our lives by enabling us to assess the different options and what effects different decisions may have.</td>
</tr>
<tr>
<td><strong>Problem solving</strong></td>
<td>The process thought which a situation/problem is resolved (i.e., diagnosing the problem, taking action to close the gap between present situation and desired outcome, and generalizing the principles to other situations)</td>
<td>Allows us to deal constructively with problems in our lives, that left unattended could cause new problems, including mental and physical stress.</td>
</tr>
<tr>
<td><strong>Creative thinking</strong></td>
<td>The ability to depart from traditional ways of thinking, resulting in the generation of original and innovative ideas that enable us to respond adaptively to life situations.</td>
<td>Contributes to both decision making and problem solving by enabling us to explore the available alternatives and various consequences of our actions or non-actions.</td>
</tr>
<tr>
<td><strong>Effective communication</strong></td>
<td>The ability to express ourselves, both verbally and non-verbally, in ways that are appropriate to our cultures and situations.</td>
<td>Allows the transfer of information, understanding, and emotion from one person to another to make one’s intent clear.</td>
</tr>
<tr>
<td>Life Skills</td>
<td>Definitions</td>
<td>Significance</td>
</tr>
<tr>
<td>-----------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Interpersonal relationship skills</td>
<td>The ability to relate positively with people, creating an environment in which people feel secure and free to interact and express their opinions.</td>
<td>Allows us to keep friendly relationships, which can be of great importance to our mental and social well-being, and impacts the way we communicate with, motivate and influence each other.</td>
</tr>
<tr>
<td>Self-awareness</td>
<td>Having a sense of identity and an understanding of our own feelings, beliefs, attitudes, values, goals, motivations, and behaviors.</td>
<td>Helps us to recognize our feelings and values and is a prerequisite for effective communication, interpersonal relationships, and developing empathy for others.</td>
</tr>
<tr>
<td>Empathy</td>
<td>The ability to imagine what life is like for another person, even in a situation that we are unfamiliar with.</td>
<td>Can help us to accept others who may be very different from ourselves, respond to people in need, and promote other positive social interactions.</td>
</tr>
<tr>
<td>Coping with emotions</td>
<td>The ability to recognize a range of feelings in ourselves and others, the awareness of how emotions influence behavior, and the ability to respond to emotions appropriately.</td>
<td>Enables us to respond appropriately to our emotions and avoid the negative effects that prolonged, pent up emotions may have our physical and mental health.</td>
</tr>
<tr>
<td>Coping with stress</td>
<td>The ability to recognize the sources of stress in our lives and the effects that stress produces, and the ability to act in ways that help us cope or reduce our levels of stress.</td>
<td>Enables us to adjust our levels of stress and avoid the negative consequences of stress, including boredom, burnout, susceptibility to diseases, and behavioral changes.</td>
</tr>
<tr>
<td>Life Skills</td>
<td>Definitions</td>
<td>Significance</td>
</tr>
<tr>
<td>-----------------------------------</td>
<td>-----------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Refusal Skills</td>
<td>The ability to communicate the decision to say “no” effectively (so that it is understood).</td>
<td>Enables us to carry out health-enhancing behaviors that are consistent with our values and decisions.</td>
</tr>
<tr>
<td>Assertiveness Skills</td>
<td>The ability to state one’s point of view or personal rights clearly and confidently, without denying the personal rights of others.</td>
<td>Assertiveness skills enable people to take actions that are in their own best interests. Such actions include the ability to stand up for oneself or someone else without feeling intimidated or anxious and to express feelings and points of view honestly and openly.</td>
</tr>
<tr>
<td>Healthy self-management/monitoring skills</td>
<td>The ability to make situational and lifestyle behavior choices that result in attaining and/or maintaining one’s physical, social, emotional, spiritual, and environmental health.</td>
<td>Enables us to maintain health-enhancing decisions from day to day as well as to reach longer-term health and wellness goals.</td>
</tr>
</tbody>
</table>

Life Skills Methodology in the Classroom

Participatory, interactive teaching and learning methods are critical components of this type of education. These methods include role plays, debates, situation analysis, and small group work. It is through their participation in learning activities that use these methods that young people learn how to better manage themselves, their relationships, and their health decisions. In addition to the use of participatory, interactive teaching methods, skills-based health education also considers the developmental stages (physical, emotional, and cognitive) of a person at the time of learning. Learning activity are designed to be appropriate to the students' age group, level of maturity, life experiences, and ways of thinking. At the same time, participatory activities provide the opportunity for students to learn from one another and appreciate the differences, as well as similarities, among individuals in the classroom setting.

PARTICIPATORY LEARNING

Participatory Learning is central to life skills teaching. During childhood most social interaction occurs in groups. This can be capitalized upon, and used in a structured way to provide a situation in which students can learn, share experiences and practice skills together. The role of the teacher is to facilitate this participatory learning of the group members, rather than conduct lectures in a didactic style.

It is recognized that there are advantages of working in group because group work:

- increases participants' perceptions of themselves and others
- promotes cooperation rather than competition
- provides opportunities for group members and their teachers to recognize and value individual skills and enhance self-esteem
- enables participants to get to know each other better and extend relationships
- promotes listening and communication skills
- facilitates dealing with sensitive issues
- appears to promote tolerance and understanding of individuals and their needs
- encourages innovation and creativity.

PART II: CURRICULUM CONTENT
The content for HFLE is organized around four themes:

Self and Interpersonal Relationships
Sexuality and Sexual Health
Appropriate Eating and Fitness
Managing the Environment

Theme: Self and Interpersonal Relationships

Descriptor: Acceptance of self, the need to belong, and the need to be loved are some of the universal needs and rights that contribute to the shaping of our individual selves. Students need to develop a healthy self-concept in order to foster healthy relationships within the family, school, and community. They also need to be assisted in developing resiliency—the capacities to assess, cope, manage, and benefit from the various influences that impact on relationships. Students need to practise skills that reduce their involvement in risky behaviours such as: crime, violence, bullying, alcohol and other drugs, and motor vehicle accidents and other accidents. The acquisition of these skills will increase students’ ability to assume a responsible role in all aspects of personal, family, and community living. Students must be committed to valuing and respecting the rich diversity (cultural, ethnic, and religious) of the people of the Caribbean. Additionally, they must be encouraged to realise their fullest potential as contributors to sustainable development while embracing core values and democratic ideals.

Key Ideas:
• Human beings are essentially social, and human nature finds its fullest expression in the quality of relationships established with others.
• Self-concept is learned, and is a critical factor in relationship building.
• Effective or healthy relationships are dependent on the acquisition and practice of identifiable social skills.
• Supportive social environments are critical to the development of social skills in order to reduce feelings of alienation, and many of the self-destructive and risk-taking tendencies, such as violence and drug-use among children and youth in the region.
• Teachers have a critical role to play in creating supportive school and classroom environments that preserve and enhance self-esteem—a critical factor in the teaching/learning process.

Regional Standards
1. Examine the nature of self, family, school, and community and their influences in order to build strong healthy relationships.
2. Acquire coping skills which will enable them to shun behaviours and lifestyles associated with crime, drugs, violence motor vehicle accidents, and other injuries.
3. Respect the rich differences that exist among Caribbean peoples as a valuable resource for sustainable development of the region within the framework of democratic and ethical values.
## Self and Interpersonal Relationships Standard 1: Core Outcomes

<table>
<thead>
<tr>
<th>Core Outcomes: Understanding Self Ages 5-16</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Age Level 5-6</strong></td>
</tr>
<tr>
<td>1. Demonstrate awareness of self</td>
</tr>
<tr>
<td>their individual attributes, strengths,</td>
</tr>
<tr>
<td>and uniqueness when relating to own</td>
</tr>
<tr>
<td>family and in classroom.</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>Age Level 11-12</strong></td>
</tr>
<tr>
<td>1. Analyse the influences that</td>
</tr>
<tr>
<td>impact on personal, social and</td>
</tr>
<tr>
<td>development (media, peers, family,</td>
</tr>
<tr>
<td>significant\other,</td>
</tr>
<tr>
<td>community, etc.)</td>
</tr>
<tr>
<td>2. Identify factors within self which</td>
</tr>
<tr>
<td>lead to healthy relationships.</td>
</tr>
</tbody>
</table>

1. Demonstrates tolerance in relationships with others.
2. Recognize the relationship between self concept (perception of self) and mental and emotional well being.
## Self and Interpersonal Relationships Standard 2: Core Outcomes

<table>
<thead>
<tr>
<th>Core Outcomes: Coping With Risk And Adversity Ages 5-16</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Age Level 5-6</strong></td>
</tr>
<tr>
<td>1. Recognize signs of risky or unfavourable situations.</td>
</tr>
<tr>
<td>2. Develop skill is assessing their vulnerability in adverse situation.</td>
</tr>
<tr>
<td>3. Demonstrate age appropriate response in risky or unfavourable situation.</td>
</tr>
<tr>
<td><strong>Age Level 7-8</strong></td>
</tr>
<tr>
<td>1. Demonstrate awareness of behaviours and situation that can place them at risk of injury to themselves and others.</td>
</tr>
<tr>
<td>2. Develop and display risk response strategy to unfavourable or threatening situation. Risk Response:-</td>
</tr>
<tr>
<td>- Whom to tell</td>
</tr>
<tr>
<td>- Where to go</td>
</tr>
<tr>
<td>- What to do</td>
</tr>
<tr>
<td>- What to say in an unfavourable situation</td>
</tr>
<tr>
<td><strong>Age Level 9-10</strong></td>
</tr>
<tr>
<td>1. Identify ways of coping with feelings and emotions when under pressure in adverse situations.</td>
</tr>
<tr>
<td>2. Develop refusal and negotiation skills for dealing with risky or adverse situations.</td>
</tr>
<tr>
<td><strong>Age Level 11-12</strong></td>
</tr>
<tr>
<td>1. Develop resilience for coping with adverse situations (death, grief, rejection, and separation).</td>
</tr>
<tr>
<td>2. Analyse the impact of alcohol, and other illicit drugs on behaviour and lifestyle.</td>
</tr>
<tr>
<td>3. Demonstrate skills to cope with at violence at home school, and in the community.</td>
</tr>
<tr>
<td><strong>Age Level 13-14</strong></td>
</tr>
<tr>
<td>1. Demonstrate skills to avoid high-risk situations and pressure to use alcohol and other illicit substances.</td>
</tr>
<tr>
<td>2. Display skills to prevent the escalation of violence at home, school and the community.</td>
</tr>
<tr>
<td><strong>Age Level 15–16</strong></td>
</tr>
<tr>
<td>1. Design and implement strategies for fostering positive behaviours in the school, home and community.</td>
</tr>
<tr>
<td>2. Collaborate with community and Societal programmes/ Activities that steer individual away from risky behaviour and situations.</td>
</tr>
<tr>
<td>3. Assess the availability and capacity of public and private (NGO’s) institutions to meet the needs of at risk youth.</td>
</tr>
</tbody>
</table>
## Self and Interpersonal Relationships Standard 3: Core Outcomes

### Core Outcomes: Respect and Tolerance for Self and Others Ages 5-16

<table>
<thead>
<tr>
<th>Age Level 5-6</th>
<th>Age Level 7-8</th>
<th>Age level 9-10</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Display respect and tolerance in social interactions with peers and others who may be different.</td>
<td>1. Demonstrate skills and behaviours for building harmonious relationships with family and friends.</td>
<td>1. Affirmation of persons who are different from oneself (ethnic and cultural). 2. Appreciate that resources among diverse people are essential to developing positive relationships. 3. Appreciate that ethnic and cultural differences can add variety and richness to relationships and to available resource.</td>
</tr>
<tr>
<td>Age Level: 11–12</td>
<td>Age Level 13-14</td>
<td>Age Level 15-16</td>
</tr>
<tr>
<td>1. Assess ways in which personal and group efforts can be enhanced by the interactions and contributions of persons of diverse cultural and ethnic groupings. 2. Recognise the value of personal commitment and hard work to the improvement of self, others, and the wider community. 3. Assess how the characters and ethnic groups can enhance development in Caribbean groups and individuals. Caribbean personal and groups e.g. sports and games.</td>
<td>1. Critically examine how relationships can be affected by personal prejudices and biases. 2. Recognise that the development of the region depends on individual and collective efforts at all levels of society.</td>
<td>1. Appreciate the value of harmonious relationships in contributing to regional integration and sustainable development. 2. Advocate for acceptance and inclusion of persons from diverse groupings at all levels of society. 3. Demonstrate the ability to access opportunities presented by regionalism (CARICOM Single Market and Economy) and globalization.</td>
</tr>
</tbody>
</table>
Theme: Sexuality and Sexual Health

Descriptor: A differentiation needs to be made between the terms sex and sexuality. Sexuality is presented as including biological sex, gender, and gender identity. One’s sexuality also encompasses the many social, emotional, and psychological factors that shape the expression of values, attitudes, social roles, and beliefs about self and others as being male or female. It is important to have students develop positive attitudes about self and their evolving sexuality. Young people make daily decisions about their sexual behavior, values, and attitudes. Family, religion, culture, technology —including media, and peers, influence these decisions. It is critical to provide students with knowledge and skills that will assist them in understanding their own sexuality and realizing their potential as effective and caring human beings. Young people are facing a variety of risks that compromise their sexual and reproductive health. Acquisition of requisite skills to counteract these risks will increase the opportunity to maximize learning and provide a foundation for a healthy population. Beyond knowledge of HIV/AIDS, and STIs as a disease issues related to the physical and emotional aspects of HIV/AIDS, stigma of living with HIV/AIDS, and discrimination against people living with HIV/AIDS are addressed. Students are encouraged to examine a range of options for reducing vulnerability to these problems such as abstinence, a drug-free lifestyle and so on.

Key Ideas:
- Sexuality is an integral part of personality, and cannot be separated from other aspects of self.
- The expression of sexuality encompasses physical, emotional, and psychological components, including issues related to gender.
- Sexual role behaviours and values of teachers and children are conditioned by family values and practices, religious beliefs, and social and cultural norms, as well as personal experiences.
- Educational interventions must augment the socialization role of the family and other social and religious institutions in order to assist in preventing/minimizing those expressions of sexuality that are detrimental to emotional and physical health and well-being.

Regional Standards
1. Demonstrate an understanding that the concept of human sexuality as expressed throughout the life cycle, is an integral part if every individual.
2. Analyse the influence of socio-cultural and economic factors, as well as personal beliefs on the expression of sexuality and sexual choices.
3. Develop action competence and build capacity to recognize the basic criteria and conditions for optimal reproductive health, and reduce vulnerability to priority problems, including HIV/AIDS, cervical cancer, and STIs.
4. Utilise knowledge and skill to access age-appropriate sources of health information, products and services related to sexual health.
5. Develop knowledge and skills to access age-appropriate sources of health information, products, and services related to sexuality and sexual health.
# Sexuality and Sexual Health Standard 1 Core Outcomes

<table>
<thead>
<tr>
<th>Age Level 5-6</th>
<th>Age Level 7-8</th>
<th>Age Level 9-10</th>
</tr>
</thead>
</table>
| 1. Demonstrate an awareness of private parts of the body. Recognize that boys and girls are different.  
2. Respond appropriately to uncomfortable/risky situations. | 1. Apply proper personal care and hygiene practice.  
2. Demonstrate awareness of similarities and differences between boys and girls.  
3. Respond appropriately to uncomfortable or risky situations.  
4. Provide support to peers and siblings in uncomfortable and risky situations. | 1. Explode personal experiences various components of human sexuality.  
2. Demonstrate awareness of the onset of puberty and the Physical, Emotional and Cognitive changes which accompany it. |

<table>
<thead>
<tr>
<th>Age Level 11-12</th>
<th>Age Level 13-14</th>
<th>Age Level 15-16</th>
</tr>
</thead>
</table>
| 1. Display knowledge of the various components of human sexuality.  
2. Develop strategies for coping with the various changes associated with puberty.  
3. Assess traditional role expectations of boys and girls in our changing society.  
4. Assess ways in which behavior can be interpreted as being "sexual". | 1. Assess the capacity to enter into intimate sexual relationships.  
2. Demonstrate use of strategies for recognizing and managing sexual feelings and behaviors.  
3. Display adequate social skills to refuse and reject unwelcomed and abusive sexual advances to self and others. | 1. Display knowledge of the various components of human sexuality.  
2. Respond appropriately to various components of human sexuality.  
3. Critically analyze the consequences of intimate sexual relationships.  
4. Demonstrate the ability to respond to intimacy in developmentally appropriate ways. |
### Sexuality and Sexual Health Standard 2 Core Outcomes

#### Core Outcomes: Socio-cultural Influences on Sexual Behavior Ages 5-16

<table>
<thead>
<tr>
<th>Age Level 5-6</th>
<th>Age Level 7-8</th>
<th>Age Level 9-10</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Develop the capacity to cope and empathize in real life situations.</td>
<td>1. Demonstrate awareness of the capacity for both boys and girls to perform similar task. 2. Demonstrate ways to respond appropriate to various factors influencing sexual choices and experience.</td>
<td>1. Demonstrate an understanding of the ways in which sexuality is learned. 2. Demonstrate ways to respond appropriately to the key factors influencing sexual choices and experiences. 3. Demonstrate knowledge of various types of sexual abuse and exploitation.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Age Level 11-12</th>
<th>Age Level 13-14</th>
<th>Age Level 15-16</th>

## Sexuality and Sexual Health Standard 5 Core Outcomes

| Core Outcomes: Access Sources Of Health Information & Services Ages 5-16 |
|---|---|---|
| **Age Level 5-6** | **Age Level 7-8** | **Age level 9-10** |
| 1. Demonstrate awareness of family and school as sources of information on health. | 1. Identify family, school and community services as sources of information on health. | 1. Assess family, school, and community resources as sources of accurate information that deal with health, social, and emotional issues. |
| **Age Level 11-12** | **Age Level 13-14** | **Age Level 15-16** |
| 1. Demonstrate the ability to locate and utilize community resources that support the health, social, and emotional needs of families. | 1. Evaluate the ability and appropriateness of the resources to address reproductive health and parenting issues. 
2. Demonstrate an understanding of the basic tenets that address the sexual health of children and youth. | 1. Locate and utilize available services that support the health needs of adolescence. 
2. Critically analyze the appropriateness of these services in response to adolescent needs in your community or country 
3. Evaluate and adjust sexual health goals and advocate for adolescent-friendly services to achieve these goals. |
Theme: Appropriate Eating and Fitness

Descriptor: Students need to understand that healthy eating and the right balance of safe, nutritious, and wholesome foods (are critical to optimum health throughout the life-cycle, and they should acquire skills to make healthy food choices and reduce the incidents of diet-related/lifestyles diseases. Students need to develop skills that will help them with making choices in favor of sound fitness habits to achieve optimum levels of age-appropriate physical activity which promotes good health. Students need to assess barriers relating to fitness, and develop the skills to conduct physical fitness self-assessments. Students need to critically examine how their eating and exercise behaviors are influenced by family culture as well as social, economic and religious factors and media. They need to learn how to make healthy choices and display habits which lead to a healthy active lifestyle. Students should be capable of identifying and accessing age-appropriate information, products, and services relating to eating and fitness from reliable legitimate sources. Students should be encouraged to critically assess information, products, and services relating to eating and fitness for the attainment and maintenance of good health throughout the life-cycle.

Key Ideas:
• Dietary and fitness practices are influenced by familial, socio-cultural and economic factors, as well as personal preferences.
• Sound dietary practices and adequate levels of physical activity are important for physical survival.
• The quality of nutritional intake and level of physical activity are directly related to the ability to learn, and has implications for social and emotional development.
• The eating and fitness habits established in childhood are persistent, conditioning those preferences and practices, which will influence quality of health in later life.
• Teachers are well poised to assist students in critically assessing the dietary choices over which they have control, using the leverage provided by classroom instruction and the provision of nutritionally-sound meals in the school environment.

Regional Standards
1. Demonstrate the capacity to make healthy food and eating choices throughout the life cycle to reduce the risk factors associated with the development of chronic diseases.
2. Demonstrate and understanding of fitness and its relationship to good health and quality of living.
3. Analyse the influence of socio-cultural and economic factors, as well as personal beliefs on lifestyle choices related to eating and fitness.
4. Develop knowledge and skills to access age-appropriate sources of information, products, and services related to eating and fitness.
### Appropriate Eating and Fitness Standard 1 Core Outcomes

<tr>
<th>Core Outcomes: Making Healthy Choices Ages 5-16</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Age Level 5-6</strong></td>
</tr>
</tbody>
</table>
| 1. Develop the ability to choose and eat healthy foods.  
2. Demonstrate basic hygiene and food handling practices.  
3. Explain why our bodies need food.  
4. Demonstrate beginning knowledge of healthy foods and 'empty calorie' foods. | 1. Promote selection of healthy foods among family and peers.  
2. Maintain safe hygiene and food handling practices.  
3. Initially analyse the location of food on the nutrients pyramid.  
4. Place food in categories according to (animal or plant) source or manufactured. | 1. Recognise healthy eating as a critical component of healthy living throughout the life cycle.  
2. Demonstrate ways to select a balanced meal using a variety of foods.  
3. Apply safe food-handling principles. |
| **Age Level 11-12**                           | **Age Level 13-14**                           | **Age Level 15-16**                           |
| 1. Assess personal eating habits.  
2. Appreciate the importance of selecting nutritious foods for a healthy lifestyle.  
3. Make appropriate food choices to avoid risk factors associated with lifestyle diseases (e.g., excess salts, sugars and fats).  
4. Apply safe food-handling principles. | 1. Demonstrate knowledge of the relationship between types and uses of nutrients in food and overall health.  
3. Explain and practice food preservation and food safety principles. | 1. Critically assess the relationship between eating and the impact on the overall health and development of the individual, family, community, and country.  
2. Advocate for food establishments to adhere to food guidelines in support of healthy public policies and practices.  
3. Apply safe handling principles. |

| 1. Engage in various activities for health, fun and development of motor skills.  
2. Demonstrate an awareness of safe behaviors during physical activity. | 1. Perform gross loco motor and fine loco motor movements to improve health and fitness.  
2. Display safe behaviors and others during physical activity | 1. Recognize and value fitness as another critical component of healthy lifestyle.  
2. Incorporate safety principles when engaged in fitness activities.  
3. Design and implement an age-appropriate physical fitness plan  
4. Appreciate the role of fitness in achieving good health. |
| **Age Level 11-12**                                    | **Age Level 13-14**                                    | **Age Level 15-16**                                   |
| 1. Differentiate between exercise (aerobic capacity, flexibility, muscular strength, and endurance), sport fitness, and physical activity.  
2. Make appropriate food choices with respect to physical activity, and exercise to attain and maintain a healthy lifestyle.  
3. Incorporate safety principles when engaged in physical fitness.  
4. Design and implement an age-appropriate physical fitness plan. | 1. Critically analyze the complementary nature of a healthy lifestyle (i.e., eating right, daily physical exercise/fitness, sleep, school/work, and leisure activities).  
2. Incorporate safety principles when engaged in physical fitness.  
3. Design and implement an age-appropriate physical fitness plan. | 1. Design and implement fitness interventions utilizing safety principles for individuals, peers, family, and community.  
2. Assess individual and family vulnerability to lifestyle related diseases.  
3. Evaluate and make adjustments to nutrition and fitness plans. |
## Appropriate Eating and Fitness Standard 3 Core Outcomes

| Core Outcomes: Factors Influencing Eating and Fitness Ages 5-16 |
|---|---|---|
| **Age Level 5-6** | **Age Level 7-8** | **Age Level 9-10** |
| 1. Recognize that there is a relationship between the foods eaten and physical activity.  
2. Make appropriate choices for eating and physical activity.  
3. Demonstrate awareness for cultural and religious factors that influence eating and physical activity. | 1. Apply basic eating fitness rules (safety, space awareness) to maintain optimum health.  
2. Demonstrate an awareness of cultural/social factors that influence eating and physical activity in individual families. | 1. Demonstrate an understanding of factors that influence eating and fitness behaviors.  
2. Make varied choices to broaden experiences related to eating and fitness. |
| **Age Level 11-12** | **Age Level 13-14** | **Age Level 15-16** |
| 1. Recognize the impact of socio-cultural and economic factors, as well as personal beliefs and choices related to eating and fitness behaviors.  
2. Assess the nutritional value of culturally-diverse foods.  
3. Make varied choices to broaden experiences related to eating and fitness. | 1. Analyze social, emotional, and economic influences on personal choices of food and fitness.  
2. Make varied choices to broaden experiences related to eating and fitness.  
3. Set personal eating and fitness goals for optimum health. | 1. Demonstrate an understanding of the relationship among balanced meal, food prices, values and beliefs, including religion.  
2. Respond appropriately to the impact of social determinants (poverty etc.) on appropriate eating and fitness.  
3. Evaluate and adjust personal eating and fitness goals for optimum health. |

Theme: Managing the Environment

Descriptor: It is important for students to develop a basic understanding of the features and operations of natural environmental systems and the threats to their sustainability. Students need to be aware of the environmental health threats and the main factors in their causation and understand the impact on their lives. Students need to understand and appreciate the impact and benefits of a healthy, sustainable environment on their health and well-being. Students need to develop the knowledge and skills to effectively utilize scientifically sound and affordable responses to address both the issues of protecting the environment and protection from the environment. Students should be capable of identifying, accessing, and critically assessing age-appropriate information, products, and services relating to managing the environment.

Key Ideas:
- All human activity has environmental consequences.
- Access to, and current use of technologies have had an unprecedented negative impact on the environment.
- Human beings are capable of making the greatest range of responses to the environment, in terms of changing, adapting, preserving, enhancing, or destroying it.
- There is a dynamic balance between health, the quality of life, and the quality of environment.

Regional Standards
1. Demonstrate an understanding of the inter-relationships of a sustainable natural environment.
2. Demonstrate an understanding of the environment threats to the health and well-being of students, families, schools, and communities.
3. Analyse the relationship between a sustainable and health environment and social and economic well-being of students, schools, families, and communities.
4. Demonstrate scientifically sound and affordable responses to the creation of a health and sustainable environments and the reduction of environmental health threats in the home, school, community, and region.
5. Develop knowledge and skills to access age-appropriate sources of information, products, and services related to managing the environment.

<th>OUTCOME</th>
</tr>
</thead>
</table>
| Understand the impact of empathy and sympathy on self and in relationship with others | Emotional-Coping Skills (self-awareness, coping with emotions) Social Skills (interpersonal skills, communication skills, conflict resolution) Cognitive skills (problem-solving skills) | **Empathy and Sympathy:**  
- Demonstrate skills of empathy and sympathy  
- Understand the relationship of empathy and sympathy to the development of self  
- Understand the process of grief and loss | Discuss the meaning of empathy and sympathy.  
Give examples of empathy and sympathy.  
Have students recall when they have felt empathy and sympathy.  
Read a story that will rouse feelings of empathy and sympathy | Understand the impact of empathy and sympathy on self and in relationships with others. Recognize that the same feelings/emotions can be experienced by different persons allowing them to feel the impact of empathy and sympathy. |

Concept:
- Empathy and sympathy help people to develop an understanding of similar experiences that people face.

Materials:
- Discussion
- Emotion/Feeling Faces
- Story books
**THEME:**  SELF AND INTERPERSONAL RELATIONSHIP  
**MODULE 3:**  Managing Emotions  
**Unit 1:**  What are the emotions (universally)?

**General Aim:** Demonstrate an understanding of emotions that are universally recognized and experienced (fear, anger, sadness and happiness)

<table>
<thead>
<tr>
<th>STANDARD</th>
<th>CONTENT/SKILLS</th>

TIPS FOR DEVELOPING AND EVALUATING AN HFLE LESSON

- OBJECTIVES MUST BE CLEARLY STATED. ALIGN OBJECTIVES TO THE REGIONAL STANDARDS AND CORE OUTCOMES

- IDENTIFY AND SELECT THE LIFE SKILL AND THE CORRESPONDING SUB-SKILLS FOR THE SPECIFIC LESSON

- ENSURE THAT STUDENTS ARE ACTIVELY ENGAGED IN THE ASSESSMENT PROCESS E.G., STUDENTS ARE EXPECTED TO BE INVOLVED IN INTERACTIVE METHODOLOGIES SUCH AS ROLE PLAYS, DEMONSTRATIONS, GUIDED DISCUSSIONS ETC

- ENSURE WHAT IS BEING ASSESSED MATCHES WHAT IS BEING TAUGHT

- BE GUIDED BY THE FOLLOWING HANDOUT: “life-skills and sub-skills for HFLE life-skills based learning experiences” AND TEACHING A SKILL CHECKLIST

- IDENTIFY ASSESSMENTS THAT ARE INDIGENOUS TO THE CARIBBEAN

- BE GUIDED BY THE FOLLOWING HANDOUT: “life-skills and sub-skills for HFLE life-skills based learning experiences” AND TEACHING A SKILL CHECKLIST

- IDENTIFY ASSESSMENTS THAT ARE INDIGENOUS TO THE CARIBBEAN

Source: Health and Family Life Education Teacher Training Manual, December 2012
Setting Up the Classroom Atmosphere

Students may react to this program in different ways. They may:

- Ask baiting questions (to try to embarrass you).
- Remain silent because of embarrassment.
- Shock or try to amuse by describing sexually explicit behaviors.
- Ask very personal questions about your private life.
- Make comments that open themselves to peer ridicule or criticism.

To deal with these situations it is important to set class rules. These must be very clear to the students before you start. You can have students develop their own rules or you can start with a list and discuss with the students if they are fair and why they are important. A suggested list might be:

- Students are expected to treat each other in a positive way and be considerate of each other’s feelings.
- Students are not to discuss personal matters that were raised during the lesson with others outside of the classroom.
- Students should avoid interrupting each other.
- Students should listen to each other and respect each other’s opinions.
- Both students and teachers have a “right-to-pass” if questions are too personal.
- No put-downs – no matter how much you disagree with the person you do not laugh, make a joke about them or use language that would make that person feel inferior.
- Students may be offered the possibility of putting their questions anonymously to the teacher.
- Many times students laugh and giggle about sex. This should be allowed in the beginning, as it lowers the barriers when discussing sexuality.

Strategies to Deal with Special Problems

The following strategies might be used to deal with personal questions, explicit language and inappropriate behavior.

- Respond to statements that put down or reinforce stereotypes (for example, statements that imply that some groups of people are responsible for the AIDS epidemic) by discussing the implications of such statements.

- Be assertive in dealing with difficult situations for example, “That topic is not appropriate for this class. If you would like to discuss it, I’d be happy to talk to you after class.”

- Avoid being overly critical about answers – so that students will be encouraged to express their opinions openly and honestly.

- Present both sides of a controversial issue. Avoid making value judgments.

- It might be important to separate males and females in group activities that might be embarrassing to the students or where separated groups may function more efficiently.
### PARTICIPATORY TEACHING METHODS

<table>
<thead>
<tr>
<th>Teaching Method</th>
<th>Description</th>
<th>Benefits</th>
<th>Process</th>
</tr>
</thead>
</table>
| **CLASS DISCUSSION** (in Small or Large Groups) | The class examines a problem or topic of interest with the goal of better understanding an issue or skill, reaching the best solution, or developing new ideas and directions for the group. | Provides opportunities for students to learn from one another and practice turning to one another in solving problems. Enables students to deepen their understanding of the topic and personalize their connection to it. Helps develop skill in listening, assertiveness, and empathy. | • Decide how to arrange seating for discussion  
• Identify the goal of the discussion and communicate it clearly  
• Pose meaningful, open-ended questions  
• Keep track of discussion progress |
| **BRAINSTORMING**   | Students actively generate a broad variety of ideas about a particular topic or question in a given, often brief period of time. Quantity of ideas is the main objective of brain-storming. Evaluating or debating the ideas occurs later. | Allows students to generate ideas quickly and spontaneously. Helps students use their imagination and break loose from fixed patterns of response. Good discussion starter because the class can creatively generate ideas. It is essential to evaluate the pros and cons of each idea or rank ideas according to certain criteria. | • Designate a leader and a recorder  
• State the issue or problem and ask for ideas  
• Students may suggest any idea that comes to mind  
• Do not discuss the ideas when they are first suggested  
• Record ideas in a place where everyone can see them  
• After brainstorming, review the ideas and add, delete, categorize |
| ROLE PLAY | Role play is an informal dramatization in which people act out a suggested situation. | Provides an excellent strategy for practicing skills; experiencing how one might handle a potential situation in real life; increasing empathy for others and their point of view; and increasing insight into one’s own feelings. | • Describe the situation to be role played  
• Select role players  
• Give instruction to role players  
• Start the role play  
• Discuss what happened |
| --- | --- | --- | --- |
| SMALL GROUP/BUZZ GROUP | For small group work, a large class is divided into smaller groups of six or less and given a short time to accomplish a task, carry out an action, or discuss a specific topic, problem, or question. | Useful when groups are large and time is limited. Maximizes student input. Lets students get to know one another better and increases the likelihood that they will consider how another person thinks. Helps students hear and learn from their peers. | • State the purpose of discussion and the amount of time available  
• Form small groups  
• Position seating so that members can hear each other easily  
• Ask group to appoint recorder  
• At the end have recorders describe the group’s discussion |
| GAMES AND SIMULATIONS | Students play games as activities that can be used for teaching content, critical thinking, problem solving, and decision-making and for review and reinforcement. Simulations are activities structured to feel like the real experience. | Games and simulations promote fun, active learning, and rich discussion in the classroom as participants work hard to prove their points or earn points. They require the combined use of knowledge, attitudes, and skills and allow students to test out assumptions and abilities in a variety of situations. | Games:  
• Remind students that the activity is meant to be enjoyable and that it does not matter who wins  
Simulations:  
• Work best when they are brief and discussed immediately |
### SITUATION ANALYSIS AND CASE STUDIES

| Situation analysis activities allow students to think about, analyze, and discuss situations they might encounter. Case studies are real-life stories that describe in detail what happened to a community, family, school, or individual. | Situation analysis allows students to explore problems and dilemmas and safely test solutions; it provides opportunities to work together, share ideas, and learn that people sometimes see things differently. Case studies are powerful catalysts for thought and discussion. Students consider the forces that converge to make an individual or group act in one way or another, and then evaluate the consequences. By engaging in this thinking process, students can improve their own decision-making skills. Case studies can be tied to specific activities to help students practice healthy responses before they find themselves confronted with a health risk. | • Students should be asked to imagine themselves in a situation or should play a structured game or activity to experience a feeling that might occur in another setting  
• Guiding questions are useful to spur thinking and discussion  
• Facilitator must be adept at teasing out the key points and step back and pose some ‘bigger’ overarching questions  
• Situation analyses and case studies need adequate time for processing and creative thinking  
• Teacher must act as the facilitator and coach rather than the sole source of ‘answers’ and knowledge |
| **DEBATE** | In a debate, a particular problem or issue is presented to the class, and students must take a position on resolving the problem or issue. The class can debate as a whole or in small groups. | Provides opportunity to address a particular issue in-depth and creatively. Health issues lend themselves well: students can debate, for instance, whether smoking should be banned in public places in a community. Allows students to defend a position that may mean a lot to them. Offers a chance to practice higher thinking skills. | • Allows students to take positions of their choosing. If too many students take the same position, ask for volunteers to take the opposing point of view. • Provide students with time to research their topic. • Do not allow students to dominate at the expense of other speakers. • Make certain that students show respect for the opinions and thoughts of other debaters. • Maintain control in the classroom and keep the debate on topic. |
| **STORY TELLING** | The instructor or students tell or read a story to a group. Pictures, comics and photonovelas, filmstrips, and slides can supplement. Students are encouraged to think about and discuss important (health-related) points or methods raised by the story after it is told. | Can help students think about local problems and develop critical thinking skills. Students can engage their creative skills in helping to write stories, or a group can work interactively to tell stories. Story telling lends itself to drawing analogies or making comparisons, helping people to discover healthy solutions. | • Keep the story simple and clear. Make one or two main points. • Be sure the story (and pictures) relate to the lives of the students. • Make the story dramatic enough to be interesting. Try to include situations of happiness, sadness, excitement, courage, serious thought, decisions,
| | | | and problem-solving behaviors. |

Tips for Teachers on Using Interactive Teaching Methods

1. Leave time to reinforce conclusions and skills at the end of lesson
2. Reinforce to teachers to make lessons age/language appropriate. If necessary, teacher must interpret lessons so students can understand.
3. Keep small group work to the limited time frame. Tell students that it’s okay if they didn’t get everything done before time was up. There will be time to discuss further as a class.
4. Tips on how to facilitate group discussion
   • Give students examples of possible answers if no one is willing to start the discussion. You might say, “What about....”
   • Keep the discussion to the limited amount of time
   • Allow as many students as possible to participate. If one student is dominating the conversation, ask “[Name of student] has provided some great ideas. Does anyone else have an answer?”
   • If there is not enough time for all students to answer, say “We’ve had a really good discussion. There will be time in a later activity or lesson for others to participate.”
5. Tips on using small group work
   • Small groups are useful for encouraging student participation
   • Divide students into even groups (e.g., five students in each group)
   • For topics that may be gender-sensitive, separate girls and boys
   • Note that one person may need to report back to the larger group, and for students to select one person to be that reporter
   • Encourage students to take notes if necessary
   • Walk around during the group activity to hear what students are saying
6. Tips on using role-playing
   • Role-playing is a useful teaching method for practicing interpersonal skills
   • Let students know before the activity if they may be asked to role-play in front of the class afterwards
   • Remind students of the importance of body language during role-playing and paying attention to non-verbal cues.
   • If students start to get rowdy during role-playing activities, remind them to stay on the topic and walk around the class to help them focus.
7. Tips on using brainstorming
   • Brainstorming is useful for gather many answers in a short amount of time.
   • Although a number of students may want to provide answers to your question, this exercise should last only 5 minutes. You may not be able to get answers from all the students.
   • Tell students after 5 minutes that they will have many other opportunities to provide answers. Give students positive feedback on their answers.
Tips on Giving Feedback

• Keep in mind that the feedback process should be experienced as a positive, learning experience for everyone. The emphasis should be on strengthening skills, not making judgments.

• If possible, allow the person to do a self-assessment before you offer your comments.

• Use clear criteria or a checklist for giving feedback. If there are specific expectations for performance, share these with the person in advance and then use the written expectations as the basis for your feedback.

• If appropriate, make eye contact with the other person. Eye contact is an example of how body language can reinforce a verbal message. Be aware that in some cultures, eye contact between two people (e.g., a young person and an adult) might be considered disrespectful.

• First, share positive comments. This will help the person to feel good about him- or herself, and might enable the person to be more open to your suggestions for new strategies to try.

• Use constructive, positive language to offer your comments. For example, you can say, "Have you considered... ?" or "It might help to try . . ."

• Focus your comments on aspects of the performance or task, not on the person.

• Be as specific as possible. The clearer and more specific you are with your feedback-your sense of what worked as well as suggestions for improvement-the more likely the person will be to learn from the feedback and integrate your input.

• Make sure that the feedback process is two-way. Allow the person opportunities to ask clarifying questions, offer his or her opinion, etc.

• Remember that there are many ways to perform a task effectively. Don't expect the other person to adopt your way of doing things; each person needs to find an approach that works for him or her.

• Following the feedback session, give the person opportunities to demonstrate how he or she has improved in the performance of the task. Ideally, feedback should be an ongoing part of the learning process, not an isolated event.
